Attorney Scorecards
Measure and choose the most effective attorneys to drive positive outcomes

Decisions informed by Data

Choose the most effective attorneys to get the best results. CaseGlide's attorney scorecarding provides you with key performance drivers by integrating data from our unified e-billing and matter management solutions.

Effectively distribute cases to the attorneys with top performance in closures, expenses, case type, and settlement amounts.

Scorecarding also benefits outside supervising attorneys who can use it to monitor their associates' performance and compare their performance to their peers on similar cases.

One Unified Platform

CaseGlide meets the current challenges facing claims litigation teams.

- Search for attorneys that fit specific criteria, such as areas of expertise, states of practice, and years of experience

- Access objective criteria, including closure ratio, average duration, legal expense and indemnity

- Make decisions with clarity with easy-to-access performance data and evaluation tools that help you make informed decisions

Unlock the Power of your Data

Make your attorney selections actionable using performance data to determine the most effective matches. Resolve your litigated files more efficiently and more quickly with proven attorney scorecards that help you make informed decisions and drive positive outcomes. CaseGlide transforms how your Broadspire claims professionals and attorneys work together to close and resolve litigated disputes.

Contact your Broadspire account executive for a comprehensive demonstration of the CaseGlide solution and visit CaseGlide.com for more information.
