Reporting and Analytics

Access the critical data you need to make informed decisions and increase efficiencies

A single, unified system

Utilizing configurable dashboards and highly flexible reporting tools, you have complete access to the data behind your claims litigation efforts.

Easily create, share and collaborate on dashboards that provide dynamic data and visuals, allowing you to organize your real-time analytics the way you want to.

Customize and share the reports you need to understand legal spend, key litigation process tasks and dates, workflow and matter status and much more.

One Unified Platform

CaseGlide meets the current challenges facing claims litigation teams.

Unite all of your claims litigation data in one place

- Create easy-to-build dashboards that bring your important KPIs to the surface

- Compare, filter and organize your data in easily customizable reports

- Arm your people and leadership with the metrics that help them make informed decisions

Unlock the Power of your Data

Make your data actionable to help you resolve your litigated files more efficiently, more quickly and with better outcomes. Your litigation management data can help you make better informed decisions and set future strategies for success. Broadspire and CaseGlide unlock that data and give you the tools to build the dashboards and reports that matter to you.

Contact your Broadspire account executive for a comprehensive demonstration of the CaseGlide solution and visit CaseGlide.com for more information.
